

IMDD-T110L-1.5

Integrated AO Modulator & Driver

0808

The IMDD series provides the system designer with an acousto-optic modulator and associated drive electronics in a single compact package. The IMDD-T110L video input is designed for the On/Off control of laser beam intensity. A single 4 way connector provides connection to the modulation and DC inputs.

The RF drive power is adjusted by means of a 11 turn PWR ADJ potentiometer. The setting depends on the operating wavelength and desired peak efficiency.
